Career Objective

From the day I wrote my first line of code I knew I was hooked. My passion for programming lead me to master problem solving, ability to learn quickly and always stay on top of new technologies. I am looking for the right opportunity to develop my Career.

Below you will find my recent projects that showcase my skills in front end development.

Projects

Book Recommendation System

It is a flask based mini project which uses collaborative filtering to recommend related books based on authors' rating. Topics covered include Flask, Html, CSS, Python and more.

YouTube Clone

The main focus of this project is on the layout of the elements and how important layout is in making responsive websites. Topics covers include html, CSS and more.

Personal Portfolio Website

It is my personal portfolio website with modern design
Which keeps track of my achievements and projects. Topics covers include html, Css and more.
